Course Outline

Introduction to discrete mathematics and discrete structures. Topics include: propositional logic, predicate logic, mathematical reasoning and proof techniques, induction, set theory, graph theory, algorithms, time complexity of algorithms, functions, and relations.

Course Information

Instructor Name: Dr. Milica Stojmenović
Contact Information: milica.stojmenovic@carleton.ca
Lecture: Wed/Fri 5:35pm-8:25pm, MC5050
Office Hours: Wed/Fri 4:15pm-5:00pm, HCI 2110.
Course Website: https://www.carleton.ca/culearn/
TA Office hour Location: HP4125

Assessment Scheme

Your performance in this course is assessed using several components. These include four assignments, three quizzes, and a final examination (scheduled by registrar). All of these components are mandatory. The grades you achieve on these components will be weighted with the following scheme.

- Assignments (4 × 5% each) 20%
- Quizzes (3 × 10% each) 30%
- Final Examination 50%

Assignments are mandatory. You will use cuLearn to submit your assignments and you must ensure that the marks posted to cuLearn are correct within one week of the date the assignment was graded. Concerns or complaints about the grading of the assignments must be communicated to the teaching assistant that graded your work within that time. After one week, no assignment remarking is possible. No extensions or exemptions are possible.

Tutorials are mandatory. Quizzes are held during the tutorials and must be written in the tutorial section in which you are enrolled. Quizzes are 45 minutes long, are closed-book, and only cover material presented since the most recent quiz.
Learning Outcomes

If a student attends every lecture and completes every assignment and tutorial, then by the end of this course that student should be able to:

- Construct arguments and formal proofs using different techniques
- Solve expressions that use operations from arithmetic, proposition and predicate logic, and set theory
- Perform asymptotic analyses to describe the performance of different algorithms
- Explain the following topics:
  - conjunction, disjunction, negation, implication, and existential and universal quantification, union, intersection, functions, relations, countability, and the universe of discourse, time complexity, asymptotic analysis, "Big O", "Big Ω", and "Big Θ", sequences, sums, graphs, recurrence, and induction

Important Considerations

Late assignments are never accepted for any reason. Assignment submissions are handled electronically (i.e. cuLearn) and there is no "grace period" - an assignment that is submitted only one minute after the deadline is considered late and will receive a mark of zero.

Technical problems do not exempt you from this requirement, so if you wait until the last minute and then have issues with your connection, you will still receive a mark of zero. Consequently, you are advised to:

- periodically upload your progress (i.e. upload partially completed submissions)
- submit your final submission at least 30 minutes in advance of the due date and time

For each assignment you will be submitting exactly one (1) pdf file created using either Google Docs or Microsoft Office. Archives of compressed files (e.g., "zip", "rar", "tar", etc.) or documents in another format (e.g., "doc", "docx", "rtf", "txt", etc.) will be rejected and will receive a mark of zero. Hand written assignments will receive a mark of zero. Consequently, after you upload your submission to cuLearn you must re-download it immediately and ensure that:

- your submission can be opened using Adobe Acrobat Reader (i.e. it is not corrupt)
- your submission is complete

Please note that a student cannot, for any reason, be exempted from a quiz. Furthermore, since assignment specifications are posted well in advance of their due dates, illness does not excuse a student from completing an assignment.

No provision is made for missed assignments or quizzes, and no extra credit assignments will be available.
University Policies

Student Academic Integrity Policy
Every student should be familiar with the Carleton University Student Academic Integrity Policy. A student found in violation of academic integrity standards may be awarded penalties, such as: a reprimand, failing the course, or being expelled from the program or University. Some examples of offences are: plagiarism and unauthorized co-operation or collaboration. Policy information may be found in the Undergraduate Calendar.

Plagiarism
As defined by the Senate, "plagiarism is presenting, whether intentional or not, the ideas, expression of ideas or work of others as one's own". Such reported offences will be reviewed by the office of the Dean of Science. Unauthorized Co-operation or Collaboration Senate policy states that "to ensure fairness and equity in assessment of term work, students shall not co-operate or collaborate in the completion of an academic assignment, in whole or in part, when the instructor has indicated that the assignment is to be completed on an individual basis". Please refer to the course outline statement or the instructor concerning this issue.

Academic Accommodations for Students with Disabilities
The Paul Menton Centre for Students with Disabilities (PMC) provides services to students with Learning Disabilities (LD), psychiatric/mental health disabilities, Attention Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorders (ASD), chronic medical conditions, and impairments in mobility, hearing, and vision. If you have a disability requiring academic accommodations in this course, please contact PMC at 613-520-6608 or pmc@carleton.ca for a formal evaluation. If you are already registered with the PMC, contact your PMC coordinator to send me your Letter of Accommodation at the beginning of the term, and no later than two weeks before the first in-class scheduled test or exam requiring accommodation (if applicable). After requesting accommodation from PMC, meet with me to ensure accommodation arrangements are made. Please consult the PMC website for the deadline to request accommodations for the formally-scheduled exam (if applicable) at http://www2.carleton.ca/pmc/new-and-current-students/dates-and-deadlines

Religious Obligation
Write to me with any requests for academic accommodation during the first week of class, or as soon as possible after the need for accommodation is known to exist. For more details visit the Equity Services website: http://www2.carleton.ca/equity/

Pregnancy Obligation
Write to me with any requests for academic accommodation during the first week of class, or as soon as possible after the need for accommodation is known to exist. For more details visit the Equity Services website: http://www2.carleton.ca/equity/

Medical Certificate
The following is a link to the official medical certificate accepted by Carleton University for the deferral of final examinations or assignments in undergraduate courses. To access the form, please go to http://www.carleton.ca/registrar/form
Undergraduate Academic Advisor
The Undergraduate Advisor for the School of Computer Science is available in Room 5302C HP, by telephone at 520-2600, ext. 4364 or by email at undergraduate_advisor@scs.carleton.ca. The undergraduate advisor can assist with information about prerequisites and preclusions, course substitutions or equivalencies, understanding your academic audit and the remaining requirements for graduation. The undergraduate advisor will also refer students to appropriate resources such as the Science Student Success Centre, Learning Support Services and the Writing Tutorial Services. You must also read:
http://calendar.carleton.ca/undergrad/regulations/academicregulationsoftheuniversity/

Additional Notes
Excluding the time spent attending lectures and completing tutorials, students can expect to spend at least ten (10) hours per week on this course. Students are responsible for all course materials, including lecture notes, tutorial exercises, and all materials discussed in class and on any of the official discussion boards.
Students are asked to pose all questions related to course content using the official discussion boards on cuLearn; students should not email the instructor directly unless the question contains confidential information or it is of a personal nature.
The instructor will attempt to answer every student email received within three business days of the time the message was received, unless the email requests information already posted on cuLearn or in the course outline. To ensure that all announcements are received, students are expected to check their email on a daily basis.
All materials created for this course (including, but not limited to, lecture notes, in-class examples, tutorial exercises, assignments, examinations, and posted solutions) remain the intellectual property of the instructor. These materials are intended for the personal and non-transferable use of students registered in the current offering of the course. Reposting, reproducing, or redistributing any course materials, in part or in whole, without the written consent of the instructor, is strictly prohibited.

Plagiarism Policy
There is a separate plagiarism policy document for this course that is located on cuLearn under the heading of Course Information. Students must read this document thoroughly and must agree to adhere to this policy (and to all policies stated in this course outline) before the assignment resources are made available.
In the event that a student has been found to have committed an instructional offence, a penalty will be applied to that student's final grade. If the penalty applied by the Office of the Associate Dean is less than the total value of the assignment, the remaining weight associated with that assignment is shifted onto the weight of the final exam. Consider the following case as a clarifying example: if the course has an assignment worth 10% and a final worth 40% and a student plagiarizes and receives a 50% deduction to his or her assignment, their final exam would be worth 45% of their final mark and the plagiarized assignment would be worth nothing. To clarify, 50% of the 10% allocated to the assignment was lost and the remaining 50% of the 10% allocated to the assignment was shifted to the final.
Students are invited to discuss any concerns with the instructor at the earliest opportunity.
