Calendar Description

Practical aspects of cryptography. Pseudo random number generation, symmetric cryptography (stream and block ciphers), modes of operation, hash functions, message and entity authentication protocols, zero knowledge, pitfalls deploying public-key encryption and digital signatures, key distribution, secret-sharing.

Prerequisites

One of COMP2402, SYSC2100, and a MATH course at the 2000-level or above.

Precludes additional credit for COMP 4103 (no longer offered).

I will assume that you are familiar with run-time complexity (big O), basic algorithm analysis, and basic [conditional] probability. It is strongly suggested that you have taken COMP 2804 before this course. You should also review modular arithmetic.

This course will involve some mathematics. This course will involve some coding.

Textbooks

There is no mandatory textbook for the course. Instead, there will be readings from online (free) resources or from material available in the library. The two main resources are

- **Handbook of Applied Cryptography**, by A. J. Menezes, P. C. van Oorschot and S. A. Vanstone ([link](#))
- **Cryptography engineering: design principles and practical applications**, by N. Ferguson, T. Kohno, and B. Schneier. (Available in library)
Evaluation

<tbody>
<tr>
<td>Tests</td>
<td>20%</td>
<td>two in-class midterm tests (Oct 18th &amp; Nov 15th)</td>
</tr>
<tr>
<td>Final Exam</td>
<td>20%</td>
<td>Scheduled by the registrar’s office</td>
</tr>
<tr>
<td>Presentations/Projects</td>
<td>5%</td>
<td>optional; to be discussed in class</td>
</tr>
</tbody>
</table>

**Note:** There will be a computational aspect to some of the assignment problems and all challenges. This may involve programming with a C++ library like NTL, using the BigInteger class in Java, using software that does symbolic computation (CAS software) or something similar to work with very large numbers (and perhaps work with elliptic curves). If you are using a non-standard language you must receive approval from the TAs first.

**Note:** Your assignments must be typeset. My suggestion is to use \LaTeX \ or some other similar variant (such as X\LaTeX if you want to easily use nice fonts). I will post the assignment .tex files on the course webpage if you want to use these as a starting point for your solutions.

**Important Dates**

See the University Calendar for all important dates:

http://carleton.ca/registrar/registration/dates-and-deadlines/

- **Thur, Sep 6**: First class
- **Thur, Oct 18**: Midterm 1
- **Oct 22–26**: No classes (Fall break)
- **Thur, Nov 15**: Midterm 2
- **Thur, Dec 6**: COMP 4109 Last class (Wednesday)

**Collaboration Policy**

Assignment work may be done individually or in pairs. If you work as a pair then you will submit a single assignment on behalf of both students. You may NOT work in the same pair for more than one assignment. If you want to work in pairs for more than one then you need to find another partner.

Posting assignment solutions on discussion boards before the due date and time is strictly prohibited. Asking questions about the assignment on discussion boards other than the course forum (cuLearn) is strictly prohibited.

We will be looking for plagiarism in both written solutions and in your submitted code.

**Undergraduate Academic Advisor**

The Undergraduate Advisor for the School of Computer Science is available in Room 5302C HP, by telephone at 520-2600, ext. 4364 or by email at undergraduate_advisor@scs.carleton.ca.

The undergraduate advisor can assist with information about prerequisites and preclusions, course substitutions/equivalencies, understanding your academic audit and the remaining requirements for graduation. The undergraduate advisor will also refer students to appropriate resources such as the Science Student Success Centre, Learning Support Services and the Writing Tutorial Services.
University Policies

Full academic regulations are found in the University’s calendar (link). Some excerpts are below.

Academic Integrity
Every student should be familiar with the Carleton University student academic integrity policy. A student found in violation of academic integrity standards may be awarded penalties which range from a reprimand to receiving a grade of F in the course or even being expelled from the program or University. Some examples of offences are: plagiarism and unauthorized co-operation or collaboration. Information on this policy may be found in the Undergraduate Calendar.

Plagiarism is presenting, whether intentional or not, the ideas, expression of ideas or work of others as one’s own. Plagiarism includes reproducing or paraphrasing portions of someone else’s published or unpublished material, regardless of the source, and presenting these as one’s own without proper citation or reference to the original source.

In cases where an investigation determines that a violation of the Academic Integrity Policy has occurred, sanctions may be applied by the Faculty Dean, the Provost and Vice President (Academic), or by Senate Executive.

Sanctions may include but are not limited to completion of a remediation process, a written reprimand, assignment of a failing grade, withdrawal from a course, suspension from a program, suspension or expulsion from the university.

Please see http://carleton.ca/studentaffairs/academic-integrity/ for more information.

Students with Disabilities
The Paul Menton Centre for Students with Disabilities (PMC) provides services to students with Learning Disabilities (LD), psychiatric/mental health disabilities, Attention Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorders (ASD), chronic medical conditions, and impairments in mobility, hearing, and vision.

If you have a disability requiring academic accommodations in this course, please contact PMC at 613-520-6608 or pmc@carleton.ca for a formal evaluation. If you are already registered with the PMC, contact your PMC coordinator to send me your Letter of Accommodation at the beginning of the term, and no later than two weeks before the first in-class scheduled test or exam requiring accommodation (if applicable). Requests made within two weeks will be reviewed on a case-by-case basis. After requesting accommodation from PMC, meet with me to ensure accommodation arrangements are made. Please consult the PMC website (www.carleton.ca/pmc) for the deadline to request accommodations for the formally-scheduled exam (if applicable).

Religious Obligations
Carleton University accommodates students who, due to religious obligation, must miss an examination, test, assignment deadline, laboratory, or other compulsory event. The University has a Senate-approved policy on religious accommodation that forms part of its Human Rights Policy, available at: http://www.carleton.ca/equity/

Accommodation will be worked out directly and on an individual basis between the student and the instructor(s) involved. Students should make a formal written request to the instructor(s) for alternative dates and/or means of satisfying requirements. Such requests should be made during the first two weeks of any given academic term, or as soon as possible after a need for accommodation is known to exist, but in no case later than the penultimate week of classes in that term.
Pregnancy Obligation
Write to me with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details visit the Equity Services website: http://www.carleton.ca/equity/

Medical Certificate
The following is a link to the official medical certificate accepted by Carleton University for the deferral of final examinations or assignments in undergraduate courses. To access the form, please go to http://www.carleton.ca/registrar/forms/
